Hiring Manager

Executive Genesis Services Inc.

Cabanatuan City, Nueva Ecija

Subject: Application for IT Assistant Position

Dear Hiring Manager,

I am writing to apply for the IT Assistant position at Executive Genesis Services Inc. I saw your job post on your official Facebook page, and I was really happy to know you are hiring here in Cabanatuan City. Your company has a good reputation, and I truly want to join your team and grow my skills in a real IT workplace.

I am currently pursuing a Bachelor of Science in Information Technology at PHINMA Araullo University — South Campus. I have learned basic programming, computer systems, and digital tools in my studies. I often serve as the project leader in our group works — I assign tasks, guide my teammates, and check our final outputs to make sure they are good. I also help at our church as a Technical Support Volunteer, where I edit videos, manage live streaming, and create social media content. These experiences taught me how to be responsible, pay attention to details, and work well with others. I am good at using Microsoft Office and Google Workspace. I also made a simple database project before that taught me how to organize information properly.

Your job post says college students are welcome to apply and no work experience is required. This gave me confidence to send my application. I am very willing to learn, do my best, and help your company in any way I can. I am a fast learner, eager to be trained, and ready to take on any task assigned to me.

Thank you for reading my application. I hope to hear from you soon, and I am available for an interview anytime.

Sincerely,

Christine Joyce C. Valera

PROCESS & INTEGRITY NOTE

I found the job opportunity on the official Facebook page of Executive Genesis Services Inc. I chose this source because it is the company’s verified page, so the information comes directly from them and is reliable.

Before using the information, I checked if it was current and trustworthy. I confirmed the page was verified, the post was active and recently updated, and the location and qualifications match what was posted. I also made sure the details were accurate and not misleading.

I used AI tools to help brainstorm ideas, check grammar, and improve the flow of my writing. However, I personally wrote, reviewed, and edited everything myself to make sure it truly reflects my own background, skills, and experiences. AI only assisted it did not replace my own thinking.

To protect my privacy, I did not include any sensitive information such as passwords, government IDs, bank details, or home address. I kept my personal details only to what is necessary for the application. One design decision I made was to use a clean and simple layout so my portfolio looks professional, easy to read, and suitable for an IT workplace.
